

Ear Care Solutions from Bionix®

Dealer Promotion

Purchase Two Items

Buy an OtoClear® Aquabot® Kit (#7270) AND a 20 Count box of OtoClear Tips (#7202)

OtoClear Ear Irrigation Tip uses three divergent streams of water directed toward the ear canal walls to safely loosen cerumen. The soft, flexible tip prevents over-insertion into the ear, protecting the tympanic membrane yet allowing safe irrigation. The OtoClear Tip's exit portals reduce mess, improving patient and clinician satisfaction throughout the process. Clinicians achieve the best results when using the OtoClear Tip in combination with the OtoClear Aquabot Kit. The Aquabot delivers greater volume compared to other manual devices and provides a continuous stream without manually pumping.

Get for FREE

Receive a ClearLook® Lighted Ear Curette™ Variety Pack for FREE!

The ClearLook Lighted Ear Curette is designed for clinician comfort and ease of use with secure finger placement outside the line of sight. ClearLook uses both light and magnification for accurate visualization of the ear canal. ClearLook is offered in five tip styles for a variety of cerumen types and clinician preference. Reference markers ensure safe re-entry into the ear during procedures, enhancing both efficiency and safety.
