

WilburnMedicalUSA.com is proud to announce the FDA has granted Emergency Use Authorization (EUA) to our Covid-19 IgG/IgM Rapid Test Cassette (Whole Blood/Serum/Plasma)

June 30, 2020

Kernersville, North Carolina -- WilburnMedicalUSA.com, a provider of PPE and other medical supplies announced that the FDA has authorized emergency use of its COVID-19 IgG/IgM Rapid Test Cassette (Whole Blood/Serum/Plasma). WilburnMedicalUSA.com a distributor for Healgen Scientific, a subsidiary of Zhejiang Orient Gene Biotech, manufacturer of the COVID-19 IgG/IgM Rapid Test. The FDA Emergency Use Authorization in addition to WilburnMedicalUSA.com's respected relationship with Healgen Scientific allows us to currently have a very large stock of COVID-19 testing devices in our warehouse ready to ship today. Our test is a simple, rapid screening tool for the determination of IgG/IgM antibodies. The Emergency Use Authorization is powerful as it helps us increase the opportunity to reach more medical professionals. Many experts in this field have commented that proper testing is an important factor in the playbook to control the spread of COVID-19. As a part of the FDA EUA process, manufacturers were required to send tests to specific research groups so independent testing could be performed. Results will be published for review at some point in the future.

“These kits are designed for rapid testing and we have received incredible feedback so far from our clients and independent studies”, said Rick Wilburn, President of WilburnMedicalUSA.com. “The Coronavirus pandemic has been a horrible situation for the entire world and as one of our Manufacturers largest distributors in the Unites States, we are glad and honored that we can do our part to assist the medical community, corporations and first responders to help battle this world disease.

A simple to use test kit that provides results in approximately 10 minutes, COVID-19 IgG/IgM Rapid Test Cassette (Whole Blood/Serum/Plasma) are intended for use with whole blood, serum or plasma samples. The kits detect IgM that may appear in blood within 3-5 days following incubation and IgG that appears as soon as 1-2 weeks. The test kits should only be used for medical use and only a medical professional should conduct the test. Our test kits have a shelf life of 24 months from the date of manufacturer and can be stored at room temperature or even in a refrigerator.
